Packaging

With over 300 customers throughout the UK trading in many diverse markets our main objective is to supply quality products at a competitive price whilst providing exceptional levels of customer service.

Whether a customer requires a bespoke packaging product developed in our design facility, or a standard FEFCO style we have the technical expertise, competencies and capabilities to meet or exceed customer's requirements.

Our Team

Our team have over 150 years packaging experience and we are all committed to helping our customers improve their packaging line efficiencies through innovative carton design. Each customer has a dedicated Customer Service Representative who knows and understands the account. Their sole purpose is to ensure that your account runs as smoothly as possible on a daily basis.

Design Facility

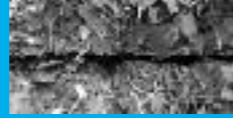

We have the latest CAD design software and plotter table operated by our fully qualified design team. By thoroughly assessing your packaging requirements our team can provide bespoke designs to suit your needs. We also offer the option of a free sampling service.

Manufacturing Capabilities

Sheard Packaging, over the last 5 years, has invested in excess of £6m into state of the art equipment and we now have an extensive plant list with the capability to produce regular cases up to five colour print shelf ready packaging, flatbed, rotary die cuts and multi point glue work.

Recycling

We are one of the few independent waste paper processors and waste transfer stations that are accredited with ISO 9001:2008 and ISO 14001:2004.

We believe in providing a fast, reliable, efficient and cost effective waste solution that is tailored to your individual needs. This is the key to our success - enabling us to establish strong working partnerships with our customers.

We conduct a comprehensive site audit which allows us to analyse all waste streams and waste handling equipment that you have on site. Our focus is to provide your business with the solution to increase efficiencies in your production areas and provide **zero landfill** for your general waste.

We service a wide range of industry - from printing and distribution centres to retail centres and offices. Our state of the art plant allows us to process various paper grades, cardboard, reels, reel ends, plastics, general waste or special wastes.

Our flexibility and fleet of vehicles enhance our service. We offer fast and reliable collections, 24/7, for regular and 'one-off' collections.

Secure Shredding

Our secure shredding department specialise in the collection and destruction of confidential data and counterfeit merchandise.

Our secure shredding service is efficient and confidential. All confidential material is collected and destroyed within 24 hours. Our clients include insurance companies, accountants, solicitors, the police and document storage companies.

Our collection times are flexible, we work around you and we can virtually destroy any material, always at a competitive price. We have a full portfolio of secure containers which can be utilised by you to contain your confidential data prior to collection

When we collect your confidential waste we will also dispose of any other recyclable waste you have - **free of charge** - including cardboard and paper.

All our staff are CRB checked, screened and vetted, will always carry an ID badge and wear Sheard branded clothing.

Our secure site is monitored by CCTV surveillance and alarmed around the clock. Our fleet of vehicles are fitted with alarms and immobilisers.

We openly extend an invitation to visit our site and view your confidential data being destroyed. Alternatively, we offer access to a web camera to view your data being destroyed on line, with a pre allocated viewing slot.

- ISO 9001:2008
- ISO 14001:2004
- A member of IPSA
- A member of BSIA
- Accredited to BS8470:2006
- Licenced with the Data Protection Registrar
- Licenced by the Environment Agency
- Licenced Waste Transfer Station
- Registered Waste Carrier

Innovation

In a fast moving industry such as ours innovation is key. We reinvest our profits into our team, plant and machinery to ensure we remain market leaders in our field.

At Sheard we are committed to continuous improvement and regularly challenge the norm. We are consistently looking for ways to improve our service, operation and product to provide our customers with the 'best in class'.

XRite Scientific Colour System

This state of the art colour recognition system means we can match any colour - and print it on a carton - no matter how complex, which means you can be confident your client gets the right result.

A scientific approach to choosing the right Board Grade

Simply tell us which product goes in the box, the weight and where it is stored and by inputting these into our computer software it will automatically advise the best board grade, taking out the guess work!

Sophisticated Stock Management

Our new Enterprise Resource Planning system allows our customers to manage and replenish their stocks remotely. Let us know the minimum and maximum levels then leave the rest to us, making the procurement process as simple as possible.

State of the art Secure Tracking

We recognise the sensitivity of the secure data being transported for destruction, our latest secure tracking device - linked to our vehicle and it's contents - can track the load from the moment it's picked up, at any stage throughout the journey and then at the point of destruction, giving total peace of mind!

M-Flute. The innovative alternative to B-Flute. A **new** type of corrugated board, M-Flute has been designed to help customers **sell more, reduce transportation costs and operate more sustainably.**

"Since using M Flute I have found the print quality to be far superior and, as there are more finished products per pallet, we have found a significant reduction in deliveries which has helped to reduce our transport costs and carbon footprint."

Packaging buyer

M-Flute is the perfect product for customers who are looking to cut their supply chain costs, make better use of their warehouse space and enhance their environmental and sustainability commitments. With no compromise on quality or performance, M-Flute is a great alternative to standard B-Flute corrugated sheet board.

With performance comparable to B-Flute and a variety of board grades available there is a solution to suit all our customer's requirements.

M-Flute Benefits:

- ◆ Up to 30% improvement in print quality
- ◆ Up to 30% more cases on a pallet
- ◆ Considerable reduction of vehicles on the road
- ◆ Approx. 30% less CO2e gases emitted
- ◆ Up to 15% reduction on your annual packaging return
